## How to make a Windows 10 USB bootable disk UEFI only. rufus

Use "rufus 2.18p" to write iso to usb stick. (Have not tried rufus 3.1p yet. "p" means portable)  
[https://youtu.be/KRxVt\\_Zd3qo](https://youtu.be/KRxVt_Zd3qo)

Partition scheme and target system type:

GPT partition scheme for UEFI

File System:

NTFS

Cluster size:

4096 bytes (default)

Check the following:

Quick format

Create bootable disk using: select ISO image file.

Create extended label and icon files.

Click "Write"

Unique solution ID: #1035
