

NAS - OpenMediaVault

OMV file manager solution - Midnight Commander

Midnight Commander - text based shell with mouse support

[Web Based File Manager? - General - openmediavault](#)

[How to Use Midnight Commander, a Visual File Manager | Linode Docs](#)

Others solution: File Browser (can only set one root directory, eg. home), CloudCMD (Docker), Krusader (Docker)

Installation:

```
sudo apt install mc
```

```
sudo apt install screen
```

Basic use:

(open a SSH shell)

```
screen
```

```
mc
```

(start moving files)

(close the connection to the SSH shell, possibly turn off the computer)

...

(open a SSH shell)

```
screen -r
```

(check if mc is done)

(close mc)

```
exit
```
