How to shutdown laptop during windows 10 initial setup (Set Up Windows)

1. At that initial setup screen, press the Shift key + the F10 key
(note, on some laptops you may have to press the Fn key at the same time so that F10 will register as a function key).
2. At the Command Prompt, type shutdown /s /t 15 and press the Enter key
3. Your computer will notify you that a shutdown will occur in less than a minute (15 seconds)
